

NUANCIER DE LA COMMUNE

Ce nuancier vise plusieurs objectifs :

- harmoniser les couleurs dans la ville, donner un cadre en fonction d'un « code couleur », pour les constructions existantes et pour les constructions nouvelles
- apporter une assistance dans le choix des couleurs aux concepteurs, aux réalisateurs, particuliers ou professionnels dans le cadre de la présentation des dossiers d'urbanisme ou de la réalisation de travaux;
- mettre en place une référence réglementaire applicable lors de l'instruction des demandes d'autorisation d'urbanisme.

Le nuancier est composé de différentes teintes, réparties en 2 rubriques définissant des typologies architecturales.

- Immeubles anciens coeur du village.

Il s'agit des bâtiments au style architectural régional, correspondant aux bâtiments du Centre Ancien mais dont les caractéristiques des teintes peuvent être transposées aux maisons individuelles nouvelles adoptant ce style.

- Bâtiments modernes et contemporains - de 1950 à nos jours

Cette rubrique concerne les bâtiments modernes et contemporains existants et à construire, jusqu'à nos jours.

Il comprend également 4 rubriques complémentaires, de portée générale. Leurs teintes se déclineront avec celles de la rubriques principales

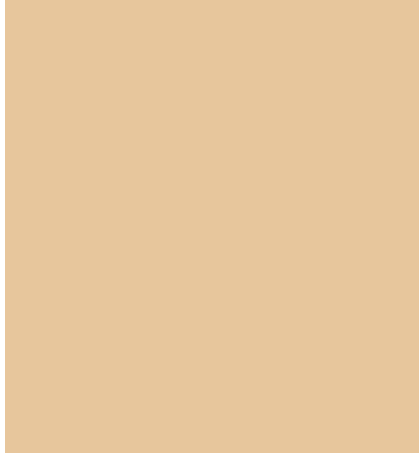

- Décors de façades
- Volets et menuiseries
- Ferronneries:
- Aspect des tuiles
